VOLUME 29 1986

Artificial Intelligence

AN INTERNATIONAL JOURNAL

Contents:

- 1 Note from the Editor
Y. IWASAKI and H.A. SIMON (Pittsburgh, PA)
- 3 Causality in Device Behavior
J. DE KLEER and J.S. BROWN (Palo Alto, CA)
- 33 Theories of Causal Ordering
Y. IWASAKI and H.A. SIMON (Pittsburgh, PA)
- 63 Theories of Causal Ordering: Reply to de Kleer and Brown
T. IBARAKI (Kyoto, Japan)
- 73 Generalization of Alpha-Beta and SSS* Search Procedures
- 119 Forthcoming Papers
R.S. MICHALSKI (Urbana, IL) and P.H. WINSTON (Cambridge, MA)
- 121 Variable Precision Logic
A.P. PENTLAND (Menlo Park, CA)
- 147 Shading into Texture
M. SELFRIDGE (Storrs, CT)
- 171 A Computer Model of Child Language Learning
R.W. JOHNSON (Washington, DC)
- 217 Independence and Bayesian Updating Methods (Research Note)
- 223 Books Received
- Book Review
R.J. KLEIMAN (Reviewer)
- 225 "Semantics and Cognition" by R. Jackendoff
- Announcement
- 237 Awards: IJCAI-87

239 Forthcoming Papers

J. PEARL (Los Angeles, CA)

241 Fusion, Propagation, and Structuring in Belief Networks

B.J. KUIPERS (Austin, TX)

289 Qualitative Simulation

P.P. CHAKRABARTI, S. GHOSE and S.C. DESARKAR (Kharagpur, India)

339 Heuristic Search through Islands (Research Note)

Book Review

A. VELLINO (Reviewer)

349 "Artificial Intelligence: The Very Idea" by J. Haugeland

Announcements

355 International Congress on Intelligent Autonomous Systems

356 Awards: IJCAI-87

359 Forthcoming Papers

362 Author Index – Volume 29, 1986

363 Contents – Volume 29, 1986

Information for Authors

1 Submission of Manuscripts

Manuscripts in English may be submitted to the Editor-in-Chief,

DANIEL G. BOBROW
Xerox Palo Alto Research Center
3333 Coyote Hill Road
Palo Alto, CA 94304, U.S.A.

or to the Associate Editor,

MICHAEL BRADY
Department of Engineering Science
Oxford University
Parks Road, Oxford OX1 3PJ, U.K.

Research Notes may be submitted to

WOLFGANG BIBEL
TUM, I. f. Informatik
Postfach 202420
8000 München 2, Fed. Rep. Germany

2 Form of Manuscripts

Please type your manuscript on good quality bond paper of uniform size (preferably 8½ by 11 inches) using one side of the paper only and double spacing throughout. Submit the original and two copies, and retain one other copy.

All illustrations, photographs, tables, etc., should be on separate sheets, and should be included in each copy. Each page of the manuscript should be numbered.

Give your full names, academic or professional affiliations, and the complete address of the author to whom proofs and correspondence are to be sent. If the main title of the paper exceeds 50 characters, including spaces between words, include an abbreviated title on the first page of the manuscript for use as a running head.

SPELLING: Webster's New International Dictionary of the English Language, Unabridged Edition, should be consulted for all questions of spelling and style.

3 Organization of the Paper

HEADING. The title of the paper should be concise and informative. Successive lines should give the author's name, academic or professional affiliation, and address.

ABSTRACT. Every manuscript must contain a concise abstract, no more than 150 words.

ACKNOWLEDGMENT. This section includes acknowledgments of help from associates, permission to publish, and financial support.

REFERENCES. See detailed instructions in Section 14.

4 Cross References

If cross references are necessary, number the section of the paper and cite cross references by section number e.g., "see Section 1.2". Avoid citing page numbers.

5 Illustrations

All illustrations should be submitted in duplicate in a form suitable for reproduction, preferably of such a size that the same degree of reduction (for example, ⅔ the original size) can be applied to all of them; they should not exceed 8 by 10 inches. Number the illustrations according to the sequence of their appearance in the text, where they are to be referred to as "Fig. 1", "Fig. 2", etc. Each illustration must have a legend. These legends should be typed (double spaced) on a separate page. Prefix each legend with the number of the illustration to which it refers.

Lettering should be done professionally with a Leroy ruler, or using transfers (Letraset, Normagraph, etc.).

Photographs should be glossy prints.

The author's name and figure number should be indicated on the back of each illustration.

The third copy of the manuscript may have xeroxed or comparably copied line drawings, but photographs should be provided for this copy so that it may be used by reviewers.

6 Literature Citations

In the text, follow the rules implied in these examples, enclosing the reference number, etc., in brackets after the author's name: Stuart [00] demonstrated ... as shown by Burke and Wills [00] ... Eyre [00, pp. 12-16] found ... In several early studies [00, p. 7; 00, p. 30] we suggested ...

For more than two authors use: Blaxland et al. [00] discovered ...

For personal communications, which will be set as references, use, for example: J. Atherton, personal communication, 1968.

7 Tables

Tables should be typed on separate pages, and numbered with Roman numerals according to their sequence in the text. Column headings should be short and self-

explanatory. A brief title should be given above each table, and any footnotes below (see Section 8).

8 Footnotes

In the text, footnotes should be used only when essential. They should be consecutively numbered throughout with superscript arabic numerals. The texts of the footnotes should be gathered on a separate page at the end of the manuscript.

In tables, footnotes are usually preferable to long explanations in the headings or body of the table. They should be placed under the table and indicated by superscript lower case letters.

9 Symbols and Abbreviations

Please use widely accepted symbols and forms of abbreviation. The system given in *The Style Manual of the American Institute of Physics* is recommended. If there is any doubt in your mind about a particular symbol or abbreviation, the first time it appears in the text, give the full expression followed by the abbreviation.

10 Mathematics

Mathematical expressions and equations should be typewritten whenever possible, with all symbols aligned as they are to appear in print. If longhand must be used, great care must be given to legibility. Greek letters and other special symbols must be identified in the left-hand margin the first time they appear. Also, distinguish carefully between one and ell, zero and upper and lower case oh, letter t and Greek tau, plus sign and dagger, etc.

Vectors will be set in bold face and should be indicated in the manuscript by underlining with a wavy line.

Equations should be numbered serially on the right-hand side by arabic numerals in parentheses. Only equations explicitly referred to in the text should be numbered.

11 Computer Languages

These should be in small capitals, LISP, CPL, ALGOL, POP-2, IPL-V, AED, etc. Please indicate computer languages by double underlining.

12 References

All literature citations should be collected in a list at the end of the paper and numbered in the order in which they are cited in the text. Retain the original title for publications in languages using the Roman alphabet. However, those employing Cyrillic and other non-Roman alphabets should be transliterated. Please note the original language at the end, e.g., "(in Russian)".

Titles of journals should be abbreviated in conformity with those given in the ACM publication, *Computing Reviews*, November 1985, pp. 636-647. If you do not have this issue available, please give the names of the journals in full and North-Holland will abbreviate them.

Please follow the style below:

Citations (1) *References to items in periodicals*: These should take the form: author, title, journal, volume number, date, pages. For authors, last names are given first, even for multiple authors: likewise for editors with the name followed by: (Ed.). The title has only the first word and proper names (or their derivatives) starting with capital letters. The date is given in parentheses.

Example:

00. Bundy, A., Silver, B. and Plummer, D., An analytical comparison of some rule-learning programs, *Artificial Intelligence* 27 (1965) 137-181.

(2) *References to reports or proceedings*: Author(s) name(s) and title (same style as above), report number, source including date and pages.

(3) *References to books*: Author(s) (same style as periodicals). Title—all principal words start with a capital letter, and the title is underlined so that it will be set in italics—publisher, city, year. Page or chapter references follow the year.

(4) *In lengthy bibliographies*, entries must be arranged alphabetically according to authors' or editors' names, or by publishing organizations for items to which no names can be attached.

13 Proofreading

(1) Authors of full-length papers will be responsible for proofreading. Galley proofs will be sent to authors, and should be returned to the publisher within three working days. No new material may be inserted in the text at the time of proofreading, except when advance permission has been obtained

from the Editor-in-Chief or the Associate Editor. Be sure to answer all queries entered on the manuscript by the publisher's copy editor.

The addition or deletion of one word may necessitate resetting several lines, or even a page or more. Make all corrections in the margin, placing in the text only the marks required to indicate where the correction is to be made. Please indicate printer's errors in blue, author's changes in red.

(2) Proofreading of Research Notes will be done by the publisher's staff. No proofs will be sent to the author.

14 Copyright

Upon acceptance of an article, author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

15 Reprints

A total of 25 reprints without covers will be provided free of charge to the senior author of each contribution.

Additional copies may be ordered at charges shown on the reprint price list that is sent to the author.
